

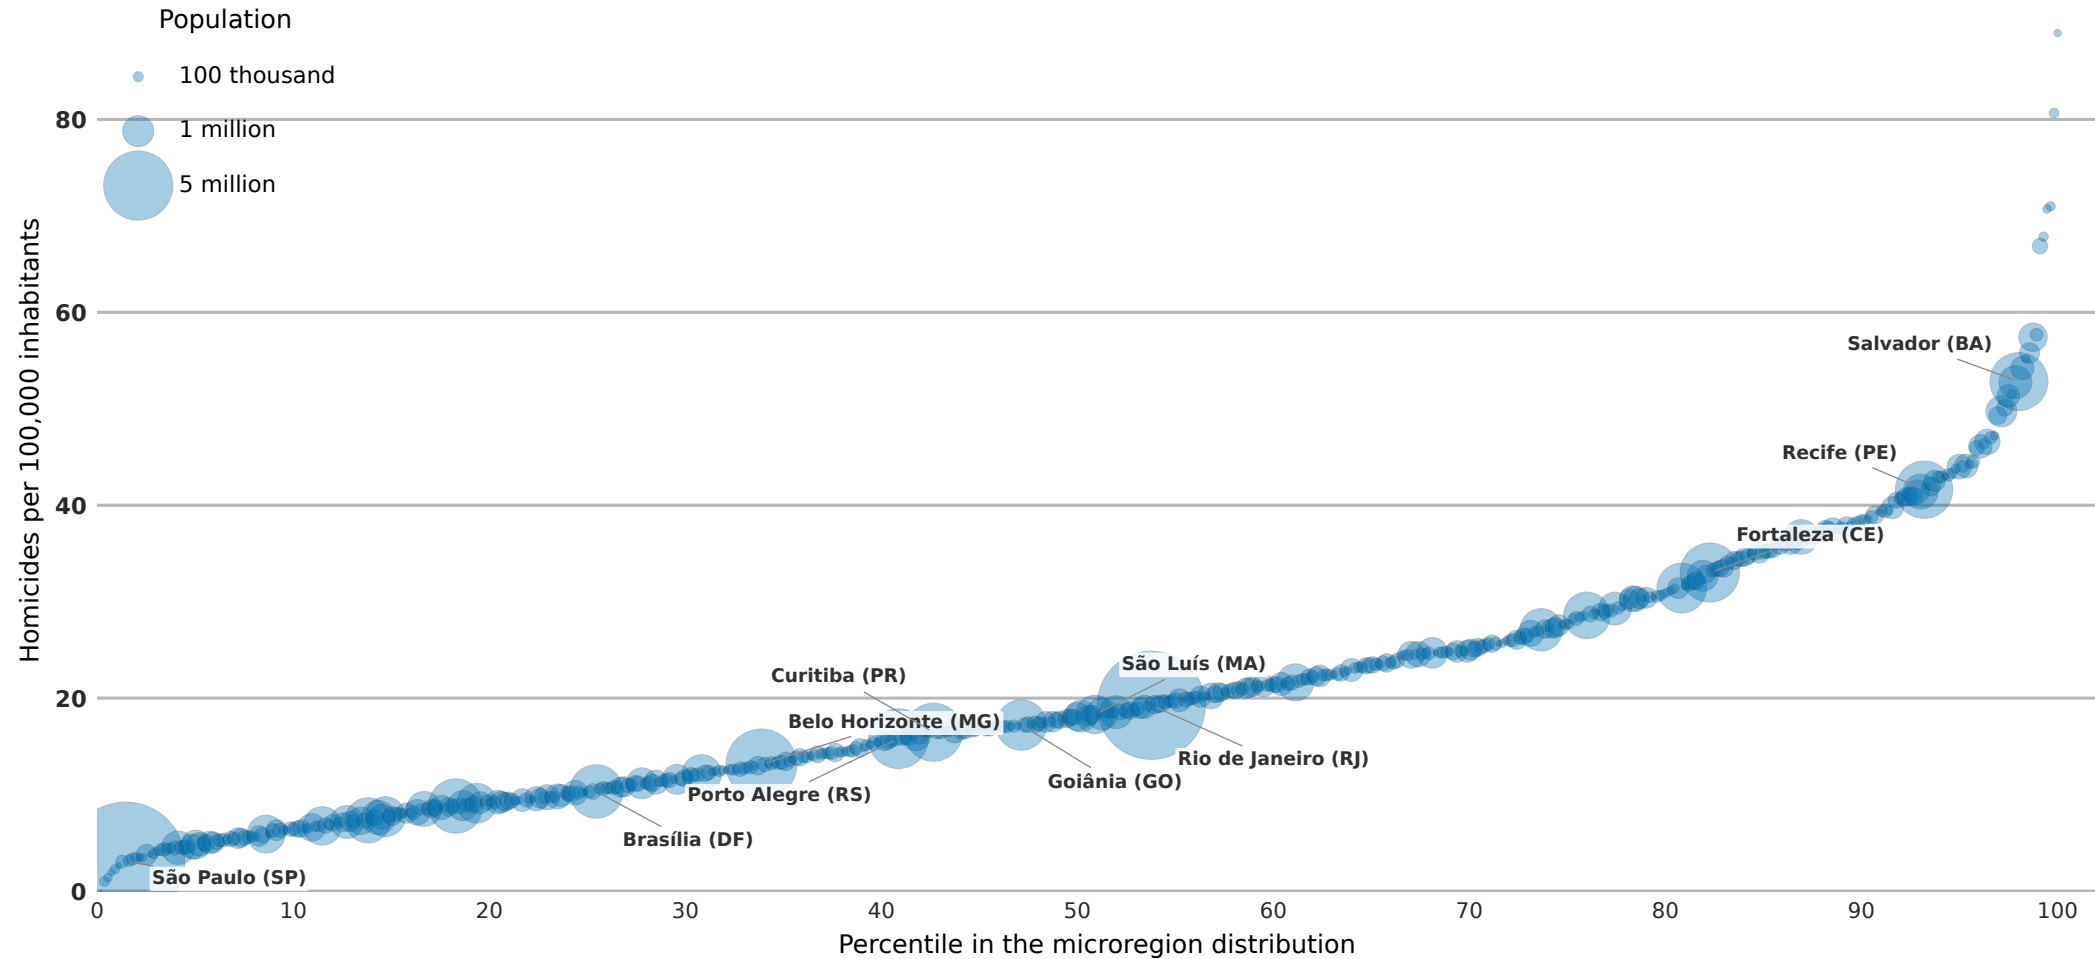

Figure 3. Brazil: distribution of homicide rates across microregions

2024 | rate per 100,000 inhabitants; bubble area represents population

Source: Authors' calculations using final SIM/Ministry of Health and IBGE data. Homicides include ICD-10 underlying causes X85-X99, Y00-Y09, Y35, and Y36 and are assigned by residence. Fixed 2015 IBGE microregion geography; deaths without an identified municipality are excluded.
