

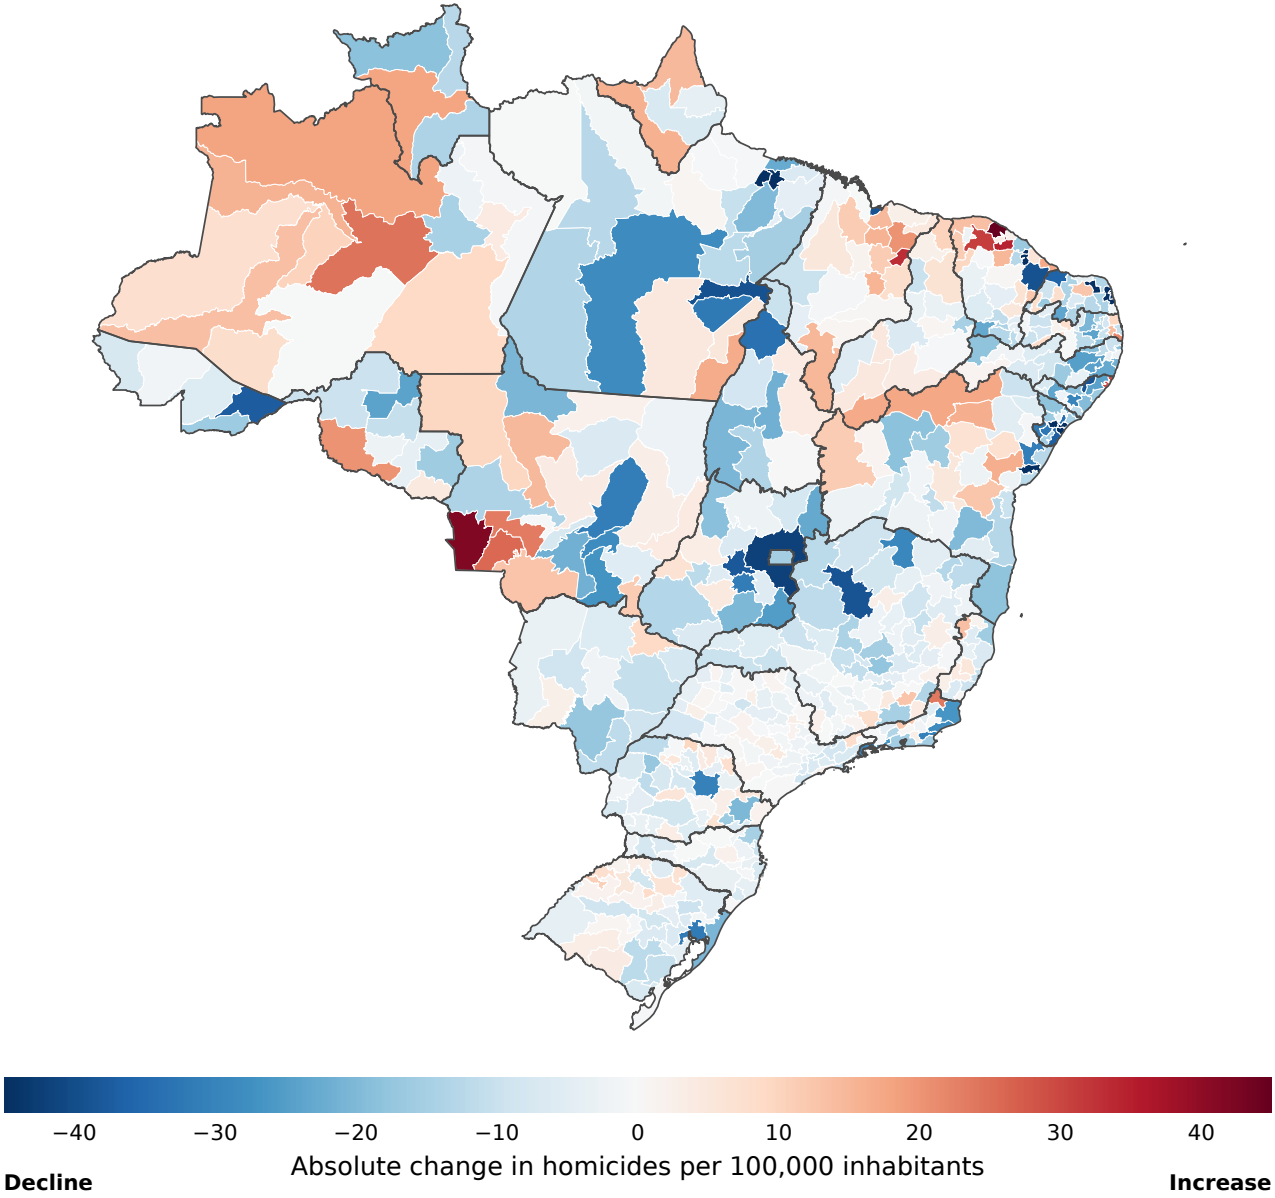

Figure 4. Brazil: change in homicide rates across microregions

Absolute change from 2016 to 2024, per 100,000 inhabitants | fixed 2015 geography

Source: Authors' calculations using final SIM/Ministry of Health and IBGE data. Homicides include ICD-10 underlying causes X85-X99, Y00-Y09, Y35, and Y36 and are assigned by residence. The visual scale is centered on zero and capped at ± 45 ; the true values for 11 microregions beyond the limits remain in the CSV.
