

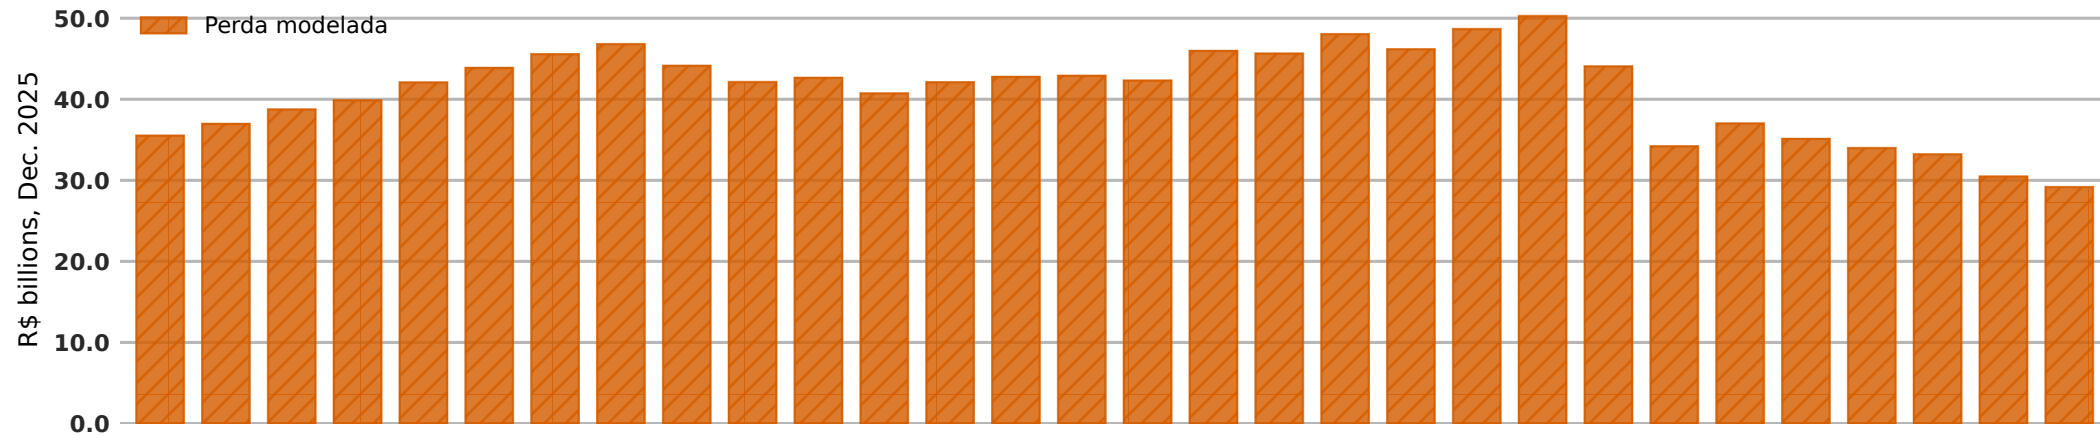

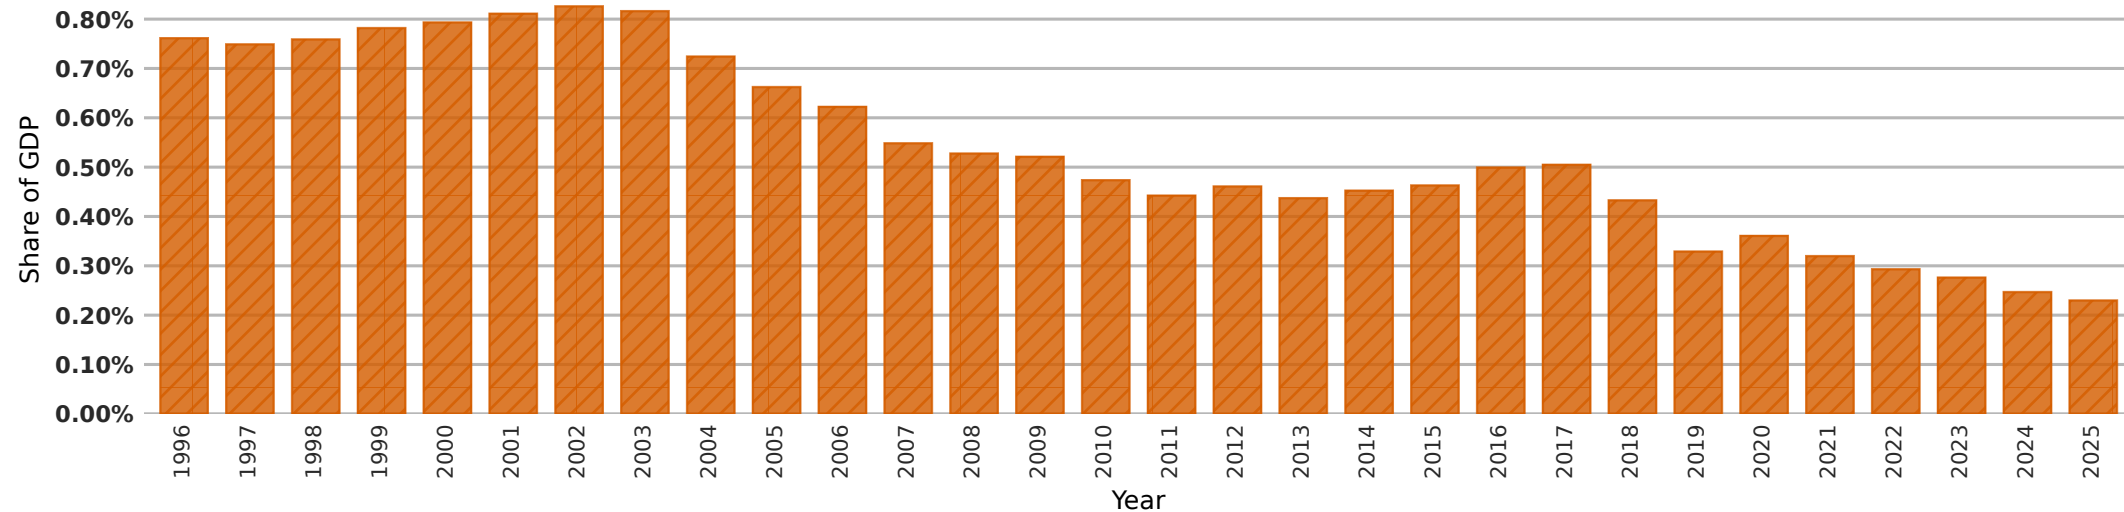

Figure 10. Brazil: productive-capacity losses from homicide

1996–2025 | modeled estimate of expected income not produced

A. Real values

B. Share of GDP

Source: Authors' calculations using SIM/Ministry of Health, Continuous PNAD, and IBGE life tables. Values in December 2025 reais. This is a modeled expected-income loss rather than observed spending. The 2025 estimate applies the aggregate homicide count to the 2024 age-region loss profile.
