

Figure 13. Brazil: measured economic costs of crime

1996-2025 | accounting total, share of GDP, and share of total

- Medical and therapeutic services

Judicial costs

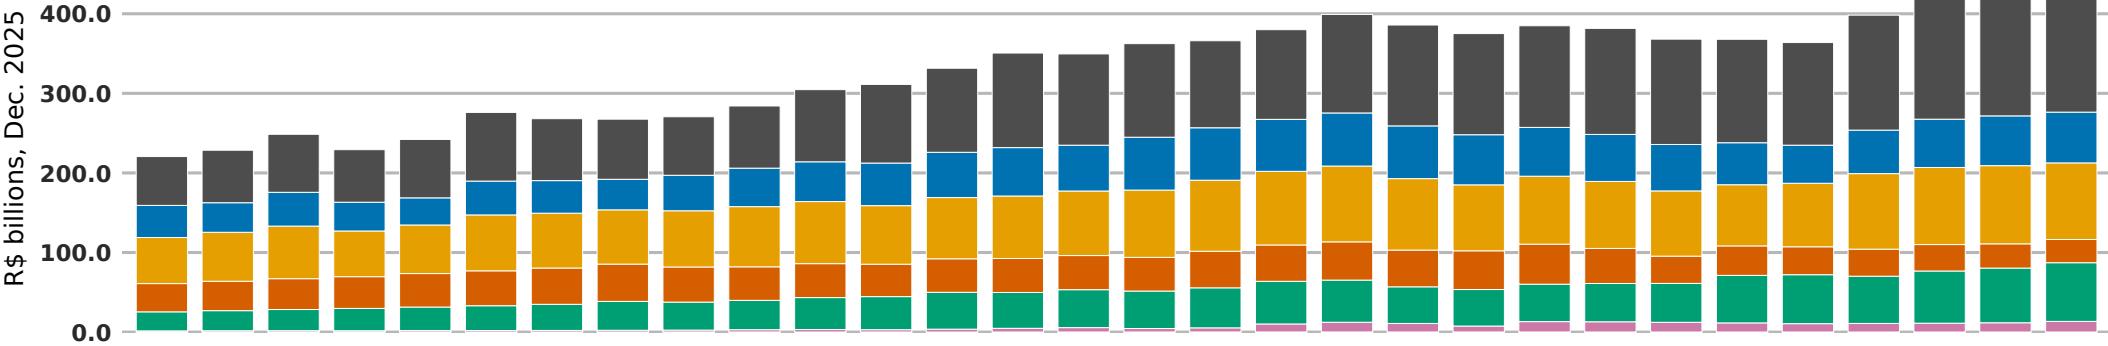

Insurance and material losses

Public security
- Incarceration and incarceration benefit

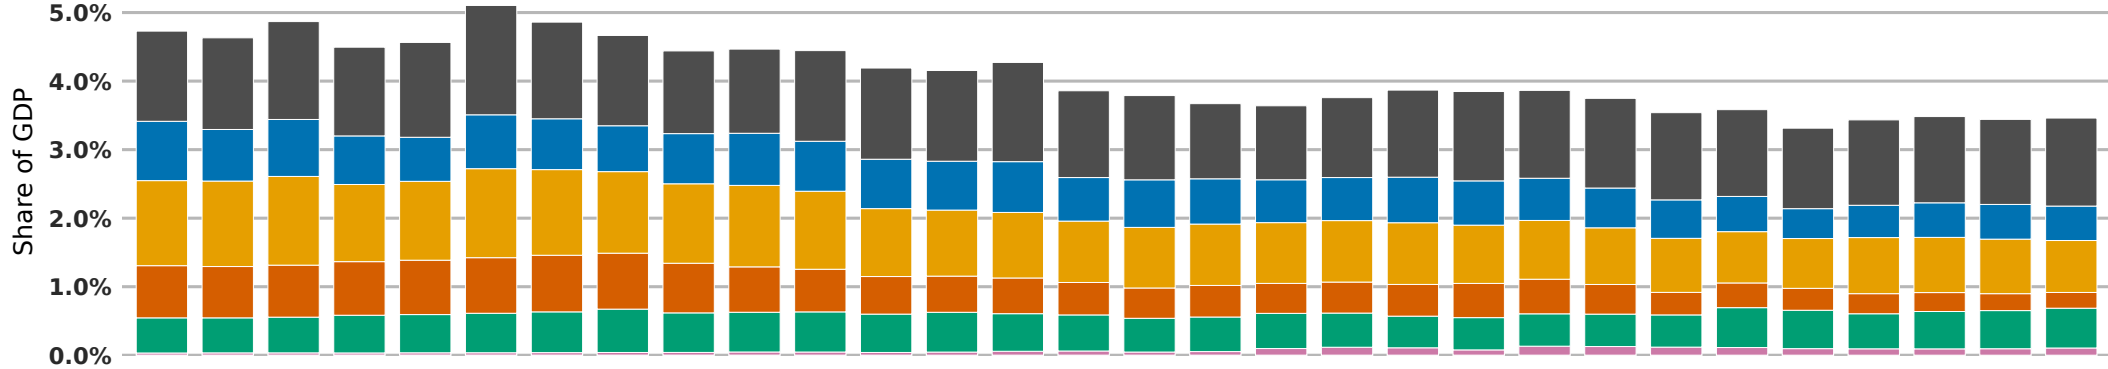

Productive-capacity losses

Private security

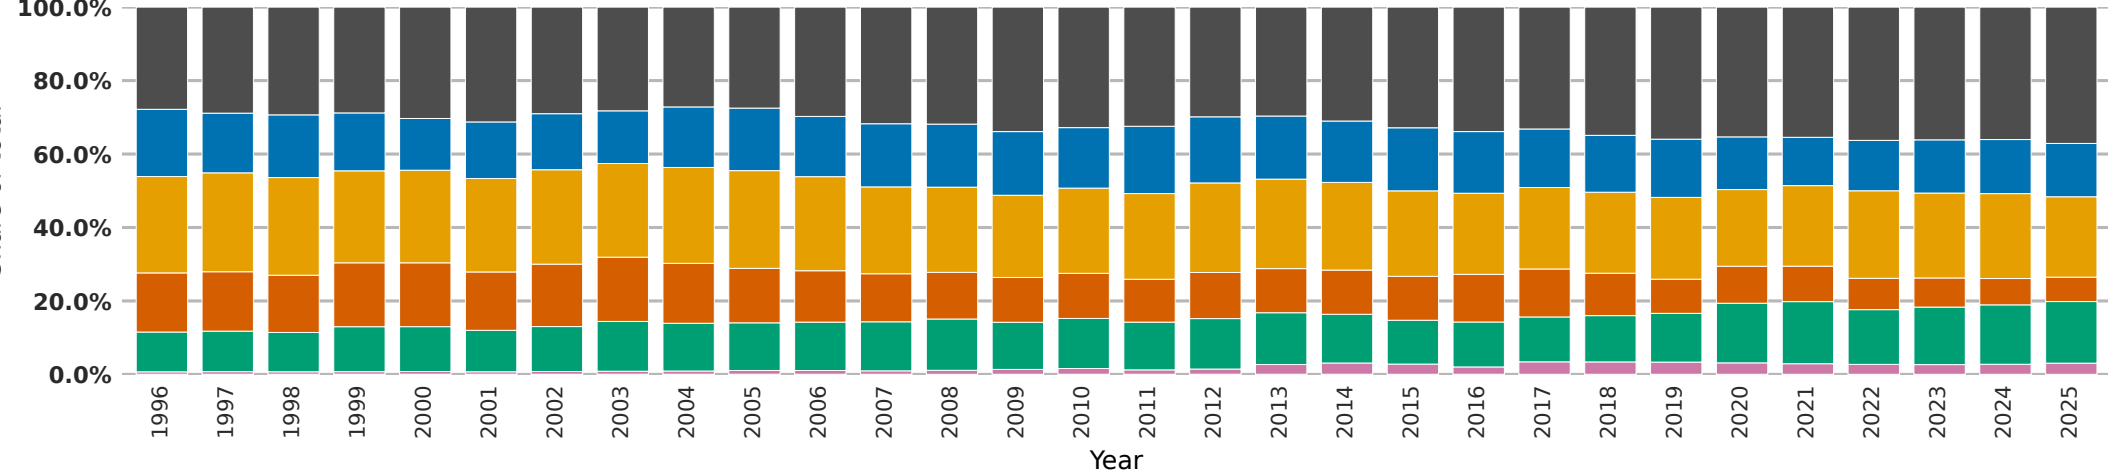

A. Real values

B. Share of GDP

C. Share of total

Source: Authors' calculations from the project's final series. Values in December 2025 reais. The total combines heterogeneous expenditures, a transfer, insurance premiums, material losses, and modeled productive losses; it is not a causal welfare-loss estimate.
